80000000000000 Could You Eat a Hippo?

W Would you like a hippopotumus steak for dinner? What! You would as lief ent horse? Well, if these high prices continue you may be driven to horse or, even worse, to a mule diet. But, getting back to the hippo steak, it is quite the thing in Africa. Come to think of it, there is nothing so awful about eating a hippopotamus except the size of the beast. and that would be nothing against it to a hungry man. Your full grown bippo weighs only about four tons. The hippo belongs to the pig-family and is much cleaner than the pig in its eating. We eat ham and bacon when we can afford to, so why not hippo?

There is a serious movement on in Louisiana to introduce the hippopotamus as a table delicacy; also to use him as a river dredge and a large mouthed consumer of the overproduction of water illies. The big brute can be tamed easily, though hardly suirable for a household pet. But be is a fine river dredge and eats water Illies like a cyclone. Thus he is an aid to navigation, for he cleans out the streams, and at low water a few hippos wallowing in a river would bring it up bank full. So serious are the Louisianians in

their desire to induce the hippopotamus to settle in their midst that they have organized the "New Food Sup-

reared in domestication, as tests made all over the world have proved. Mr. Hornaday from one female in the Bronx zoological park reared seven out of eight hippopotamuses born in eight years under, to say the least of it, unfavorable circumstances.

"I can see no reason why the hippopotamus should not become a part of the animal life of this continent to the great advantage of the human inhabitants. Think of an animal that will grow from birth to four tons in four years! Some additions to the hippopotnmus as an inhabitant would be the water buck, wart bog, reed buck, dikdik. Cape buffalo, all excellent food animals, carrying fine leather making

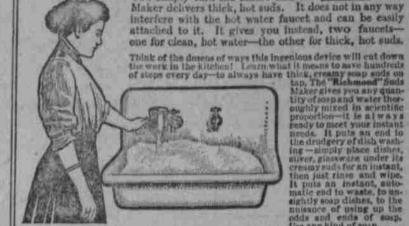

"This will give you an idea of what we intend to do. Some have said the animals will not live here. Well, when one takes into consideration that every domestic animal, including white and negro, on this continent was imported and has increased and multiplied, there need be no fear that a few others can not be found to do the same. The circus is good evidence that it can be

change her mind. The really nice young man when rejected inclines to gloom. The average young man takes up an attitude of sprightliness. To display relief when rejected may not seem in the best taste, but if a girl has refused you that is sufficient evidence that she has

no taste at all. Let us consider the method of the really pice young man. He hints at a broken heart-a picturesque but improbable happening. He asks if there is no hope. Always he speaks in "low tone." There is the authority of the best fiction for this. Apparently be by letter pretend that you did not get never shouts his query from the doorsteps as he is departing. He mentions suicide in a noncommital way and eventually takes his leave "with one last fond, lingering look at her." One can only hope be does not spoll the dramatic value of his exit by tripping over the doormat.

So much for the really pice young man. The average young man has a variety of methods for keeping his end up in the event of being rejected. He Imparts an air of levity to the proceedings which must be distinctly irritating when one is expecting time bonored references to fractured hearts and

blighted hopes. Copying the average young man, you may therefore when rejected laugh heartily and then remark:

"Well, but, joking spart, isn't the weather beautiful?" There is something about this formu-

"That's all right, old girl. Truth is I only asked you because I was feeling a bit sorry for you."

The main point is to be ready witted prough to keep your but and stick in your hand. Do not leave the house whistling, though. It prevents you from exhibiting an amused smile when she peeps at you from behind the
